

PATENTED EZ SCOOP

A convenient solution
for powdered products

PUT A SMILE ON THEIR FACES

We all know how much consumers hate to dig their hand into the powder to retrieve the scoop – not only does this compromise hygiene but it leaves a mess! TricorBraun’s patented EZ Scoop* eliminates this problem and helps create brand loyalty. So, why allow the consumer’s first engagement with your product to be anything less than positive?

Alternatives to the EZ Scoop certainly exist but none provide the same convenience, hygiene and affordability. Not only does the consumer open the package to find the scoop sitting cleanly in the neck, but after each use, they simply place the scoop back into the neck of the bottle at any radius within 360 degrees and away from the powder.

EZ Scoop is a convenient, no-mess solution that is sure to put a smile on their faces and keep them coming back for more.
