

Enhance Your Shelf Impact With Innovative Dispensing Lids

While jars have long been a preferred packaging choice, marketers are now able to more effectively differentiate their products on the shelf, add value for their consumer and expand into additional categories by employing new, customizable, enhanced jar designs. And with recent innovations in dispensing jar lids, a great packaging choice just got better!

Making A Good Thing Even Better

Benefits of value-add dispensing jar lids:

- Increased consumer convenience
- Improved product interaction
- Increased aesthetic appeal
- Brand enhancement
- Product differentiation
- Customizable options

The Latest Innovations In Dispensing Jar Lids

Available jar lid options have been expanded to now include:

- New sizes for the popular, bi-injected Camelia jar lid
- Symphony, a new lighter weight, mono-injected dispensing lid

Perfect for personal care, food, baking, pharmaceutical, household products and many more!

- Convenient
- Easy to Use
- Elegant
- Tidy
- Effortless One-Handed Operation
