Improved purchasing leverage

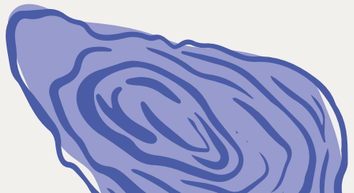
A Customer Story: Growing Together with Taylor Shellfish Farms

As **Taylor Shellfish Farms** expanded its product offering, TricorBraun expanded its support across plastic, cans and flexible packaging.

STARTING WITH FRESH SEAFOOD
Plastic Packaging | Late 2021
TricorBraun began by supplying private-label plastic tubs and cups for Taylor Shellfish's fresh, hand-shucked oyster products, establishing the foundation for a broader packaging partnership.

GROWING INTO TINNED SEAFOOD
Easy-Open Seafood Cans
As Taylor Shellfish continued investing in Ekone and growing its premium tinned seafood offering, TricorBraun sourced and tested a reliable easy-open can solution for their tuna and salmon products.

EXPANDING BEYOND TINS
High-Barrier Flexible Packaging
When Ekone expanded into refrigerated, ready-to-eat smoked oysters, TricorBraun Flex supplied a high-barrier pouch to protect freshness and support a convenient new product format.



One Partnership. More Ways to Support Growth.

As the partnership has grown, TricorBraun's support has expanded to include supply continuity, protected pricing, production access, local inventory, technical expertise and broader industry connections.

Packaging for Every Catch

From high-volume standards to hard-to-find specialty formats, we source packaging across seafood applications and help identify the right solution for your product and process.
