

# CAP & BOTTLE NECK FINISH REFERENCE GAUGE INSTRUCTIONS

## 1. PRINT

Print this document on standard 8.5" by 11" paper, using standard print options. If printing options offer a scale/zoom setting, make sure it is set to 100% so the gauge prints to actual size.

## 2. CUT

Cut along the edges of the gauge, as close as possible to the blue background to get the most accurate measure.

## 3. MEASURE

Follow the instructions on the gauge to measure cap size and bottle neck finish. Make sure cap and bottle are as close to the edges of the gauge as possible.
