

ENVIRONMENTALLY RESPONSIBLE
PACKAGING SOLUTIONS

BioBottles™

BioBottles™ are the first and only plastic packaging made with Plastic IQ™ Technology, and specifically designed and engineered for the nutraceutical industry. Plastic IQ™ is a scientifically tested and proven technology for reducing plastic pollution in the open environment and can be added to ordinary high-density polyethylene (HDPE) and polypropylene (PP) bottles, caps, and scoops.

IN STOCK AND SHIPPING NOW! We are taking orders today. Samples are available by request.

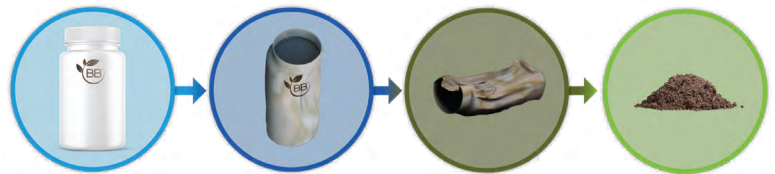

SPECS

Sizes: 50cc - 2 Gallons

Neck Finishes: Various

Material: Additive using Plastic IQ™ Technology*; can be added to virgin or post-consumer resin

Colors: Black, white. Natural or custom colors available upon request.

**When plastic products made by BioBottles™ escape the recycling collection, and end up in an open-air environment, with exposure to UV sunlight light and oxygen, Plastic IQ™ will activate and become a catalyst for transformation, reducing the product's molecular weight until the packaging is no longer plastic.¹*
