

# 63MM WIDE MOUTH PETE PACKER

For Gummies and Chews

Consumers want nutraceutical products providing preventative and proactive health maintenance, for both physical and mental wellbeing. Gummies and chews are a fun and enjoyable format to deliver products promoting long-term wellness.

## Improve Speed and Efficiency When Switching From a 53mm Packer

The larger orifice of this packer allows for larger dose size, unique shapes, increased active ingredients, and much more...

### Benefits

#### Wider Neck = Up to 2 Times Faster Filling:

For gummies, line speed is twice as fast filling a 63mm neck as a 53mm neck.

#### Less Jams, Downtime and Product Loss:

The smaller neck size of the 53mm packer causes jams which lead to product loss and down time.

#### Increased Line Capacity and Efficiency:

May delay or remove the need for extra filling lines, added personnel and maintenance downtime costs.

#### 625cc and 750cc now available in 50 grams.

**500cc prototype.** Customizable shape with appropriate volumes. Available for line trials to validate production line speeds.
