

SUSTAINABLE PACKAGING SOLUTIONS

ALUMINUM TUBES

Aluminum tubes are a sustainable alternative to plastic for personal care and cosmetic products. Available in both virgin aluminum and 100% PCR aluminum, these tubes are highly decoratable and offer an eco-conscious packaging solution for consumers who seek a premium experience.

FEATURES & BENEFITS

Recyclable, and 80% less CO₂ emissions when using PCR aluminum

Timeless, and luxurious, aesthetics for high-end products

Robust material that protects formula from air and light exposure (stability testing with formula recommended)

Available with 6-color offset printing and embossing decoration

Collapsible tube promotes complete product dispensing
