

PACKAGING SOLUTIONS

# MULTI-SERVING RTD BEVERAGE BOTTLES

Ready-to-Drink (RTD) solutions are a convenient way for consumers to enjoy their favorite functional or indulgent beverages throughout the day. Responsible brands are now incorporating multi-serving sizing and post-consumer resins into their RTD packaging offerings in an effort reduce single-use packaging and increase their recycled resin content.

**Multi-serving stock solutions, with PCR blends, are available now through TricorBraun.**
