

PACKAGING SOLUTIONS

MULTI-SERVING PET CONTAINERS

Multi-serving PET containers offer easy open and secure reseal for a variety of sweet or salty snacks. Their wide-mouth neck finish makes them easy to serve from or refill and reuse. PET offers optimum clarity to display the product inside and it is the world's most recycled plastic. With in-home snacking on the rise, multi-serving containers also mean consumers need to shop less often.

Multi-serving containers, with PCR blends, are available now through TricorBraun.
