

INTRODUCING BIOTRÉ 3.0

The entire bag is compostable.

TricorBraun Flex is excited to launch Biotré 3.0, the latest version of our Biotré packaging material. We have been on an incremental journey towards a compostable, plant-based, high barrier package to replace traditional high barrier packaging made mostly of fossil fuels and destined to end up in a landfill.

Biotré 3.0 is certified compostable by the Biodegradable Products Institute (BPI).

The BPI Certification Mark indicates third-party verification of compostability for manufacturers and brand owners to use on products and packaging and for consumers, end-users, and composters to use when determining whether or not a product or package is compostable. BPI third party certification distinguishes the manufacturers and brands that make products that comply with scientific standards from those that do not. BPI is the only third-party verification of ASTM standards for compostable products in North America

Fully Compostable

Finished packages are industrial compostable in compliance with ASTM D6868 standard for compostable plastics coated with paper (equivalent to ASTM D6400 for packages made of all plastic). Biotré 3.0 can be disposed in curbside composting bins, if available. Please check with your local waste disposal supplier for additional regulations.

Plant-Based

A majority of the package's film layers are made from renewable, plant-based materials.

Sustainable Option

Biotré 3.0 is the perfect sustainable option for specialty products such as coffee, granola, chocolates, nuts, pet treats, supplements, etc.

The Biotré Evolution

- BIOTRÉ 1.0**
60% compostable and plant-based by weight with the remaining 40% able to breakdown into microscopic particles in a landfill.
- BIOTRÉ 2.0**
Nearly 100% plant based but only 60% compostable with the remaining 40% being a durable, non-biodegradable bioplastic.
- BIOTRÉ 3.0 AVAILABLE NOW**
Majority of film layers are made from plant-based sources. Curbside compostable per ASTM.

Please note that Biotré 3.0 will be available for custom orders only, and up to our 16 oz size.
