FEATURES & BENEFITS

- Reduces secondary packaging needs and costs
- Delivered to your facility ready to be filled via ambient fill processes
- Separates for recycling (limitations depending on municipality)
- Carbon footprint up to six times lower than a glass bottle

TARGET CATEGORIES

SPIRITS

WINE

COOKING OILS

An independent Life Cycle Analysis was carried out by Intertek. If 10M of the paper-based bottles were used instead of 10M glass bottles:

The carbon savings would be approximately **4,663 tons of CO2**, which is equivalent to:

716 homes' electricity for one year

The water saving would be approximately **27,673,110 liters of water**, which is equivalent to:

184,487 full baths
